About the Distinguished Presenters

- * Mr Deepak Rauniar loves to build large-scale, future critical infrastructure at the intersection of technology/AI, energy, and capital. Mr Rauniar’s work focuses on creating globally competitive platforms where clean power, advanced compute, and long-term economics align-designed not just to operate, but to shape markets.
- ** Mr Binod Parajuli is a young hydrology analyst with more than 5 years’ experience in hydrological data processing, analysis and forecasting with special contribution in hydrological data publication and flood forecasting. Mr. Parajuli is Master Trainer of Trainees on Flood Early Warning System particularly the community based early warning system (CBEWS) in Nepal.
